
Log Metalog (K = 8) and Log QFlex-TA+ (K = 10) fitted to the latent geyser waiting times
(uniform jitter width = ±0.5 min)
Quantile Function
95% jitter envelope (1000 realizations)
EQF of the drawn realization
Log Metalog K=8 (W₁ = 1.56%)
Log QFlex-TA+ K=10 (W₁ = 1.94%)
Waiting time (min)
p
Probability Density Function
Histogram (1 min bins)
Log Metalog K=8
Log QFlex-TA+ K=10
